

Concord University Wireless Setup for iPhone

Concord's campus wireless services using the ssid name 'cusecure' are encrypted using wpa2 and require authentication to use, this requires a small setup on the iPhone user's part to connect successfully. These instructions should be sufficient to help most iPhone users to use the campus wireless service.

Getting Started

These instructions assume you have an iPhone running 3.1 or later.

1. Tap the SETTINGS icon.

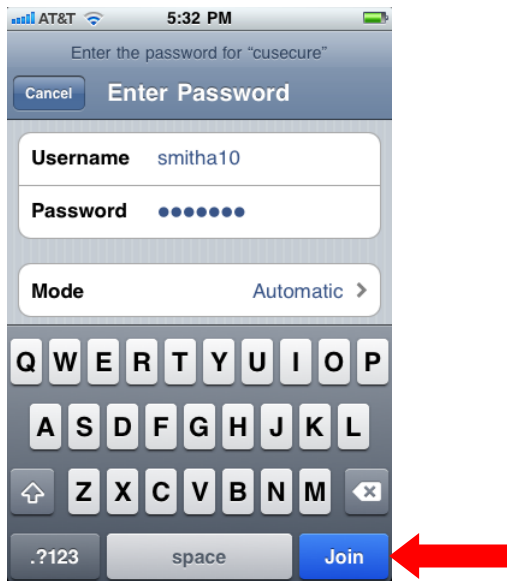

2. Tap the Wi-Fi option to open the wireless networks.

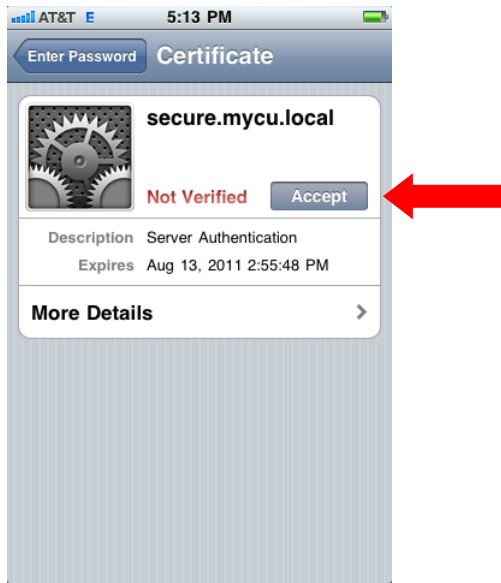

3. Tap to turn on Wi-Fi if necessary.
Select 'cusecure' from the list of networks.

4. Enter your UserID (without the @concord.edu or @mycu.concord.edu) and your password. Then tap JOIN

5. Tap ACCEPT to verify the certificate.

6. All Done!
