

University Technology Committee
January 14, 2015

The meeting was called to order at 3:01 pm in Rahall 200. The following were in attendance:

D. Hill (Mathematics & Physical Sciences)
C. Elliott (Technology Services)
D. Fitzpatrick (HR)
E. Darden (Social Sciences - Telephone)
T. Philpott (Student Affairs)
C. Lamb (Admissions)
C. Shumate (Library)
D. Turner (Financial Aid)
S. Lusk (Registrar's Office)
K. Tucker (Education)
K. Bennington (Fine Arts)

Minutes from meetings held December 10, 2014 and January 7, 2015. The only change recommended for the January 7, 2015 was an addition as Terri Philpott as an attendee. Office 2013: All labs in the Rahall Technology Center have been updated. No other labs have been updated yet. Deployment for Office 2013 will be scheduled as soon as possible after approval by each division/department.

Last week's power surge caused a problem with the server room uninterruptable power supply. One battery has been ordered and replaced. In order to be able to utilize the display screen, problem assessment and recommendation for repair will be made by a technician today. MyCU failed last week during the power surge and is not working correctly. A work-around has been developed by J. Boggs and it should allow all functionality to be unimpaired. CU is paying over \$13,000 per year to utilize My CU. Security issues and problems of off campus users of MyCU were also discussed. Additional problems of faculty on MyCU was addressed during this time. E. Darden also discussed not being able to send an attachment on Exchange. Students are not able to access their schedules on MyCU. Any information being received about problems, please refer students, faculty, and staff to the Help Desk.

Security Assessment was e-mailed to everyone with today's agenda. Report was not received until late December, 2014. More troubling findings were addressed in June, 2014 and July, 2014. Additional findings are listed in the report. One of the most challenging issues addressed was weak passwords. Weak domain passwords will be addressed as soon as the problems have been worked out of MyCU. Additional issues mentioned was an insecure configuration (Windows 2003). Appropriate recommendations for improvement will be implemented. The entire Network Security Report is available for review in C. Elliot's Office for those interested.

New Blackboard test environment needs to be created to have everything working properly.

Next meeting scheduled for January 28, 2015 at 3:00 pm in Rahall 200.
