

SmartRxU[©] Student Volunteers Needed

Are you a student at Concord, BridgeValley, UC, WVU or Marshall?
You're invited to participate in a **FREE** online and self-paced course
on medication safety. Complete this training over winter break!

SmartRxU is a medication safety and responsibility program
developed by the West Virginia Drug Intervention Institute (WV DII).
The goal of SmartRxU is to provide college students across West
Virginia with the tools necessary to make smart and healthy decisions.

Students participating in the SmartRxU medication
safety program will learn about subject matter
pertaining to college prescription drug misuse; the
health related, legal, and social consequences of
misusing prescription medications; and safe medication
practices. You will also learn about the common signs of
an opioid overdose and become certified in administering
naloxone (a life-saving overdose reversal medication).

Sign Up Today! Become a certified SmartRxU Trainer on your campus,
contact: Tinina McCourt, tinina@wvdii.org or call (681) 205-2287.
