

CHEMISTRY

A degree in chemistry can lead to a wide range of career opportunities, in health-related sciences, research, business, and teaching. Students majoring in chemistry can select flexible coursework in chemistry or other sciences allows graduates to become multi-disciplinary specialists.

Gaining the ability to think broadly in an interdisciplinary context is important. We have made the degree flexible so that you can realistically complete double majors with biology or environmental geosciences, or complete a minor in physics.

AVAILABLE EMPHASES:

Biochemistry/Pre-Med

Geochemistry

Professional Chemistry

3+1 Health Sciences

POTENTIAL CAREERS:

Biochemist

Chemist

Drug Research

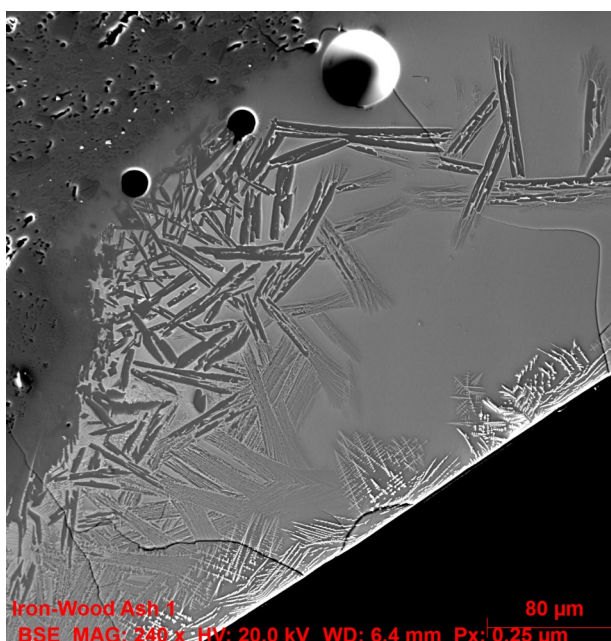

Lab Technician

Medical Doctor

Pharmacist

Research Scientist

These are just some of the many exciting career opportunities for students who major in Chemistry! Consult with your advisor to ensure your chosen emphasis is in line with your career goals.
