The Bachelor of Science in Computer Science curriculum is designed to give students a thorough understanding of computers; the physics of the hardware; the underlying mathematical principles; and the creation of software solutions. The core prepares students for a wide variety of careers and graduate school, but students can also choose one of three concentrations in which to specialize.

**Available Emphases:**
- Analysis, Simulation & Modeling
- Cybersecurity
- Software Development

**Potential Careers:**
- Computer Network Architect
- Computer Programmer
- Information Security Analyst
- Software Developer
- Software Engineer

This program will also prepare students for graduate school in Computer Science and related fields!
