| Concentration Elective | 4 |  |

The Bachelor of Science in Chemistry-3+1 Health
Sciences degree provides complete foundational coursework introducing each of the five major branches of chemistry: Analytical Chemistry, organic chemistry, biochemistry, physical chemistry, and inorganic chemistry. This program integrates a senior-year, off-campus residency at a School of Pharmacy or School of Medical Technology.

MILESTONE COURSES
Courses marked as Milestone Courses are crucial for staying on track to complete your degree in four years. Take them in the recommended semester to stay on track! If you see a recommended minimum grade, this is the grade you need to earn to have the best chance for success in this degree! Grades marked with an asterisk are required to pass.

## Helpful Hints

- Use this plan in consultation with your Academic Advisor.
- Students may take PHYS 101 and 102 instead of PHYS 201 and 202.

## ADVISING

When you choose to pursue this degree, you will be assigned an advisor who is an expert in the field of Chemistry. This advisor can help you with course selection, career planning, resume building, and help you with tracking your path to degree completion.

## CAREERS

A degree in Chemistry-3+1 Health Sciences will prepare you for careers such as: Pharmacist, Clinical Laboratory Scientist, Medical Technologist.

Consult with your advisor to ensure your chosen emphasis is in line with your career goals.

## STUDENT ORGANIZATIONS

American Chemical Society (student chapter) PATH (Pre-Med)

## Helpful Hints

- Some things to consider and discuss with your advisor:
- Off campus summer experiences
- Internships after Semester 4 and 6.
- Research with CU faculty after Semester 4.
- GRE (for grad school) after Semester 6.
- Apply to grad schools December of Semester 7.
- Students who do not obtain admission to an approved school of pharmacy or medical technology will have to take CHEM 335 and pursue a different Chemistry elective concentration during their senior year.
