The **Bachelor of Science in Chemistry** degree can lead to a wide range of career opportunities, including

health-related sciences, industry, and teaching. Selection of flexible, advanced coursework in chemistry or other sciences allows our graduates to become multi-disciplinary specialists by completing one or more elective concentrations.

AVAILABLE CONCENTRATIONS:

Biochemistry (Pre-Medicine)
Geochemistry
Professional Chemistry

MILESTONE COURSES

Courses marked as Milestone Courses are crucial for staying on track to complete

your degree in four years. Take them in the recommended semester to stay on track! If you see a recommended minimum grade, this is the grade you need to earn to have the best chance for success in this degree! Grades marked with an asterisk are required to pass.

Helpful Hints

- Use this plan in consultation with your Academic Advisor.
- All Chemistry majors must choose an emphasis: discuss with your advisor. Each concentration is 12-16 hours. See the [catalog](#) for specifics.
- Semester 1—it is recommended that you take the remaining Natural Sciences General Education Course at this point.
- Students who take PHYS 201 & 202 instead of PHYS 101 & 102 may have one 4 hour course within the chosen emphasis waived.
