

# Help students gain confidence and improve their grades with **Tutor.com 24/7 On-Demand Support**

We all want our students to succeed in high school and beyond, but we know teachers can't be available at all times of the day. Luckily, Tutor.com, a service of The Princeton Review, was designed to bridge this gap. Our tutors are among the most carefully vetted in the industry for pedagogy and subject matter expertise. Your students can access expert tutors in a variety of subjects to get the help they need with homework, studying for tests, or writing essays.

## **Equalize and Expand Educational Opportunities**

Your students can go online, enter the subject they need help with, and be connected with an online tutor in minutes. This instant access helps level the playing field and give students the assistance they need in more than 60 subjects.

## **Convenient Access**

Your students can connect with a tutor anytime and anywhere they have access to the internet—at home, at school, or on their phone. There are no downloads or plug-ins required. Anytime a student is stuck on homework, we're here to help.

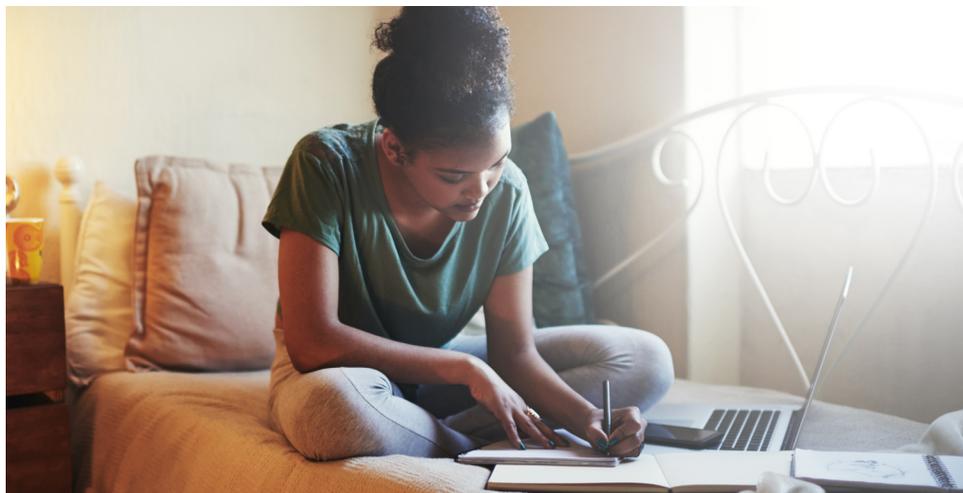

## **Client Care**

Setting up Tutor.com for your students is easy; there is very minimal technical setup required. We're also here to support you through implementation and beyond and provide regular training for your staff.

## **Predictive Insights**

We support a variety of integration methods to provide our partners with access to their students' data and progress. Predictive Insights Data Analysis provides early, actionable data that help accelerate intervention by determining whether students, either individually or collectively, are struggling to master key content.

*"We decided on [Tutor.com from The Princeton Review] to give all of our students access to one-on-one help 24 hours a day. Many of our students have commitments that make attending traditional after school tutoring difficult. [Tutor.com] meets our students where they are—on their phone, laptop, 10 o'clock at night, or on the bus from the game—and gives them personalized, live help no matter what the time. The service has been unbelievably popular with our students and over 97% of them recommend this to their friends."*

**—David Bensinger,  
Director of Instruction,  
Granada Hills Charter  
High School**
