

# ENVIRONMENTAL GEOSCIENCES

Interested in the outdoors? The environment? Adventure? Excellent career possibilities? The Bachelor of Science in Environmental Geosciences is a career-oriented, flexible major that merges traditional geology with applied environmental science. Geoscience is the study of the Earth, including its resources, fresh water, oceans, and atmosphere. Geoscientists explore, study, and monitor the Earth to protect it and the people who live on it. Students interested in the major may want to attend meetings of the Geology Club.

## POTENTIAL CAREERS:

<b>Climate Scientist</b>	<b>Mining Geologist</b>
<b>Environmental Scientist</b>	<b>Oceanographer</b>
<b>Field Geologist</b>	<b>Petroleum Geologist</b>
<b>Geologist</b>	<b>Water Resource Scientist</b>

*These are just a few of the potential career opportunities for our students. This program will also prepare you for graduate school in Geosciences and related fields!*
